## **Practical Area II – Individualized Teaching – FIRST YEAR Activities**

### **i) Observation of Individualized Teaching Lesson (ITP)**

It is expected that the trainees will get adequate information about Individualized Teaching and demonstrations and explanations on their queries.

Trainees should be given the opportunity to observe the Individualized teaching lessons in progress – 5 lessons - before they undertake the task themselves. USE THE same format of Observation of the group lessons.

#### **-Reports on observation**

### **ii) Individualized Teaching**

Trainee candidate will take 30 lessons with one child only and the child should preferably be from the preprimary section to 2<sup>nd</sup> standard.

- **5 lessons (any) supervised**
- **25 lessons unsupervised.**

The **pre-assessment** of the child for Individualized teaching shall be carried out under the supervision of an experienced trained teacher of the children with hearing impairment. If the trainee for some reason is not able to handle a particular child, she may take another one with the permission of the authority. However, the same procedure will have to be repeated with the new child including the required number of lessons. (She may take the advice of her guide when required.)

In the 1<sup>st</sup> year's final lesson, the T.C. will compare the child's 'pre-lessons and post lessons' performance, and give marks accordingly.

#### **Please note:**

*Only one and the same child is to be taken for ITP for both the years.*
